SKILLS

Languages: TypeScript,
JavaScript, Python, Java, SQL
Backend: Node.js, Express.js,
Prisma ORM, REST APIs
Databases: PostgreSQL,
MongoDB
Cloud & Tools: AWS S3, Git,
Docker, Swagger, Postman
Frontend: React.js, HTML5, CSS3
Concepts: OOP, Data Structures,
System Design, API Security

LANGUAGES

- English (Fluent)
- Hindi (Fluent)

PERSONAL DETAILS

Nationality: Indian
Date of Birth: 28 September 2003
UAE Driving License: Valid
Visa Status: Family Sponsored Visa
(Valid for 2 Years)

SUMMARY

Backend-focused Software Engineer with hands-on experience building a real-world logistics and freight management platform. Strong in Node.js, TypeScript, PostgreSQL, and Prisma, with experience designing pricing engines, secure APIs, and workflow-driven systems. Practical problem-solver with a strong understanding of backend architecture and business-centric development.

EXPERIENCE

Freelance / Independent DEC 2025 - PRESENT
Software Engineer / Full Stack Developer | DUBAI, UAE

- Designed and developed an end-to-end logistics & freight management backend system
- Built REST APIs for quotes, pricing, bookings, shipments, and tracking
- Implemented authentication, role-based access control (RBAC), and verified-user workflows
- Developed AIR and SEA pricing logic including add-ons, admin controls, and breakdown visibility
- Integrated AWS S3 for secure multi-document uploads and downloads
- Modeled complex business entities using PostgreSQL and Prisma ORM
- Implemented workflow-based status transitions, audit logs, and notifications
- Focused on clean architecture, scalability, and real-world logistics operations

YBI Foundation Jan 2025 - May 2025
Data Analytics Intern

- Completed a 16-week internship in Business & Data Analytics
- Worked with Python and Power BI on real-world datasets
- Built an interactive Personal Finance Dashboard to analyze income, expenses, and savings
- Applied data cleaning, modeling, and visualization techniques for business insights

Isarva Infotech Pvt. Ltd. Feb 2023 - Mar 2023
Web Development Intern

- Assisted in developing basic web applications using HTML, JavaScript, and Python
- Gained exposure to frontend and backend development practices

EDUCATION

Bachelor of Engineering 2021 - 2025
Information Science & Engineering
NMAM Institute of Technology, Nitte

PROJECTS

Logistics & Freight Management Platform

- Built a production-style backend handling real freight workflows
- Implemented pricing engines, document management, and shipment lifecycle tracking
- Designed secure APIs with role-based access and business rule enforcement

Personal Finance Dashboard – Power BI

- Designed an interactive Personal Finance Dashboard using Microsoft Power BI
- Analyzed income, expenses, savings, and investment data
- Cleaned and transformed datasets using Power Query
- Created KPIs using DAX for savings percentage and expense breakdowns
- Built dynamic visualizations with charts, trends, and slicers for actionable insights

Malware Detection Using Machine Learning

- Built an ensemble ML system using Random Forest, SVM, KNN, and Naive Bayes
- Used Cuckoo Sandbox for dynamic malware analysis
- Achieved ~97% accuracy using ensemble classification techniques

VOLUNTEERING & LEADERSHIP

Disciplinary Committee Member – Incredia

2023 & 2024 | College Cultural & Technical Fest

- Served on the disciplinary committee for a large-scale college event
- Assisted with crowd management, coordination, and enforcement of event guidelines
- Worked closely with organizing teams to ensure smooth event execution
- Demonstrated leadership and responsibility in high-pressure environments

Member – Vista Club (Department of Information Science & Engineering)

- Actively involved in organizing departmental technical and academic events
- Contributed to initiatives such as Tech Tuesdays and Placement Unlocked
- Assisted in sessions explaining placement procedures, preparation strategies, and recruitment flow
- Collaborated with faculty and peers to execute academic and career-oriented programs
